

We are looking for a

Full-Stack Developer.

Senior - Remote - FullTime - Netherlands

ABOUT US

TestDynamics, located in the USA & The Netherlands, is driving the AI revolution for medical imaging and diagnostics. Our mission is to modernize patient care. We empower clinicians by augmenting clinical care pathways with state-of-the-art AI models. We are an intelligent storefront that enables access to a wide variety of modern, cutting edge AI algorithms, through a dedicated user interface with single integration right into the medical institutions' workflow.

Currently, TestDynamics is looking for a **Senior Full-Stack Developer** to join our team in a full-time remote (The Netherlands) work model.

ABOUT THE OPPORTUNITY

As a Senior Full-Stack Developer you will contribute to all facets of the TestDynamics platform focusing, on reliability, performance and scale. You will work closely with other developers to design and implement various components, product owners and UX designers to understand the features we are building and to improve product experience, QA and regulatory to ensure the development of quality software. Being part of a small team at an exciting start-up in a fast-paced environment, you will be able to contribute to team growth, development of the organization and to make an impact.

WHAT WILL YOUR ROLE ENTAIL

- Design and develop various front and back-end components of the software
- Test, deploy, maintain, and improve the software
- Write reusable, readable, testable, scalable, and efficient code
- Manage individual project priorities, deadlines, and deliverables.

REQUIREMENTS

- Bachelor's or Master's degree in Computer Science, Engineering, or equivalent experience
- 4+ years of experience in full stack software development
- Experienced in object oriented programming
- Strong programming skills in backend languages such as C#
- Experience with Agile and secure software development methodologies
- Experience with cloud technologies and infrastructure
- Good written and spoken English

IMPRESS US MORE

- A link to your GitHub repository so we can check your code!
- Experience with Atlassian tools (Jira and Confluence)
- Experience with CI/CD using tools such as Git/Bitbucket
- Demonstrable capability designing, implementing, and securing RESTful endpoints with implementing RESTful services
- Experience with Docker and Kubernetes
- Experience with DICOM, FHIR, HL7
- Experience with developing solutions for the Digital Health environment, specifically medical software devices

ABOUT YOU

- Committed and pro-active
- Accurate, reliable, attention for details
- Strong analytical skills
- Curious about novel development technologies
- Always interested to learn and to challenge yourself
- You are able to work on your own as well as in a team

WHAT WE OFFER YOU

- The opportunity to help drive the AI revolution in medical imaging and diagnostics!
- Attractive and competitive salary and benefits
- Annual personal development budget
- Generous amount of vacation and flexible working hours
- Meet colleagues 4 times per year in company offsite meetings
- Being part of an international team of smart and passionate colleagues
